Chapter 2 CodePen Links

For chapter 2, the best way to access all CodePen links is to visit the collection top-level page:

https://codepen.io/collection/XzQYPV

From here, each CodePen is linked with starting and ending states.

Chapter 3 Link References:

Checking sites for link rot and broken links – link checkers listed in the video:
https://www.drlinkcheck.com/
https://chrome.google.com/webstore/detail/broken-link-checker/nibppfobembgfmejpjaaeocbogeonhch?hl=en
https://error404.atomseo.com/
https://validator.w3.org/checklink

Redirecting links on the server – .htaccess file generator demonstrated:
https://www.aleydasolis.com/htaccess-redirects-generator

Controlling which links search engines follow – read about the robots.txt file and use this as reference for creating your own:
https://developers.google.com/search/docs/advanced/robots/create-robots-txt
